A Family Paper, Devoted to the Interests of the People, and of the Democratic Party in the Nineteenth Congressional District.

VOL. IX.-NO. 22.

PAINESVILLE, LAKE COUNTY, OHIO, SATURDAY, NOVEMBER 29, 1879.

NEWS OF THE WEEK

WASHINGTON. ner Bentley, of the Pension O fice, issued the following circular on the 20th: "To enable this office to dispatch with better facility the rapidly-increasing current bus ness, a change in the system of arranging re ords and files has been made, which will render t necessary that all inquiries for the conditi of pension claims, on account of service ren dered after March 4, 1861, should contain the name of the soldier who performed military service, with his State, company and regiment as well as the number of claim or pension cer-tificate, as the case may be. Inquiries which do not contain the above information will not se answered, except in special cases, where atlure to furnish it is explained."

The Society of the Army of the Cumberlan elected the following officers for the ensuing year: President, Gen. Phil Sheridan; Vice dents, General Underwood, Massachu setts; General Barnum, New York; General Cramer, New Jersey; General Negley, Pennnia; General Duffield, Michigan; Colone lobson, Kentucky; Capt. E. E. Rhum, Ten nessee; General Morgan, Illinois; General Streight, Indiana; General Myer, Ohio; Col-onel Johnson, Wisconsin; Colonel Conover, Missouri; General Martin, Kansas; Captain linnesota; Captain Sellock, Iowa; g Secretary, Captain Steel; Corresponding Sceretary, General Clat; Treasurer eral Fullerton. Toledo was selected for

the next meeting.

The Secretary of the Interior has issued the following: "The Supreme Court of the United States having adjudged the act of July 8th, 1870, regulating the registration of trade marks to be unconstitutional, action on pend-ing applications will be suspended until further instructions shall be received from ap-plicants. Trade marks will hereafter be regred on pending or future applications only in favor of those persons who, with full knowledge of the decision of the Supreme fore paid in trade mark cases cannot be ded without further legislation by Con-

The parties interested have agreed to friendly suit in order to get a decision from of the powers exercised in regard to lottery mail matters by the postal authorities.

A Washington dispatch of the 24th states that General Grant, in a letter to Admiral Ammen, acknowledges the receipt of a letter from the Admiral in regard to the mission of Thomas De France, representative of the Nicaraguan Government, who has come to this to construct the Nicaragua Canal. General Grant says he will be in Philadelphia the 16th De France and exchange views upon the ob-ject of his visit. There is considerable specmediately accept the task of organizing a company. It is said the salary proposed is \$25,000 a year until the canal is in working order, when it is agreed to increase it to \$50,-

States Indian Contractor, was sentenced by the United States District Judge at Cheyenne, on the 22d, to a year and a half imprisonment in the penitentiary, to pay costs of suit and a fine of \$1,000, and to replace the property

The official canvass of the State vote at the

recent election in Nebraska gives Cobb, Rep., for Judge, 25,286 majority over Wakely, Dem.; 41,388 majority over Saxon, Gr. The other votes run about the same. Two brothers named Eichenaud, residing about ten miles from Virginia, Kane County, ill., were murdered by John N. and Robert Taylor, also brothers, on the 231. An old feud had existed between the families.

Charley, an Uncompangre Ute, testified before the Commission on the 23d, that Jack made the attack on Thornburg. He gave his testimony freely, and was the first Indian to

tell the truth.

Henderson and Dunn, while engaged in butchering hogs a few miles from Edinburg, Ind., on the 24th, quarreled, and Henderson, after cutting Dunn's arm with a knife, at the next blow completely severed his jugular vein, death ensuing instantly. Henderson then nounted a horse, saying he was going to deiver himself up, and has not been seen since. The Grand Jury in Covington, Ky., on the 25th ult., reported indictments against John Freet, City Collector, for embezzlement; County Judge Phelps for willful neglect of official duties in falling to keep up his official record, and W. P. McLaughlin, for malfea-

a quarrel between Mosby and Governor Hennessy. The latter official was desirous of obtaining full official information concerning the opium traffic between Hong Kong and Macao in order to check the notorious illegal practices, and applied to Mosby for copies of the United States records of shipments, etc. The Governor alleges that the request was made for the public good and with perfect courtesy, having been preferred to other foreign Consuls and all willingly responded. Mosby alleges that the request implied a claim of right to inspect Consular documents, which he was bound to resent. American citizens regret that the United States Consul has broken relations with the Governor, who had previously shown him great attention and consideration. The actual merits of the question are undetermined.

The Countess De Montijo, mother of Extempress Eugenie, died at Madrid on the 23d.

Spanish dispatches from Cape Town, South Africa, report that the attitude of the Boers is very threatening.

The widow of Charles Dickens died at her the consideration, and these, with the newes of the number settled, added to the number shown by the record, will aggregate fully 2,0,001. Since the passage of the arrears act, now invalid, widows, minor children's and dependent react, now invalid, widows, minor children's and or receipts at an unprecedented rate. The invalid claims in order than double the rate of receipts at any previous period except in 1866, and the widows of the author of the year the rate of receipts at any previous period except in 1866, and the widows of the widows of the author of the year the rate, now invalid, widows, minor children's any year since 1871. It is estimated that at the close of the year there will be not least than 250,000 unsettled cases before the office. An examination into the papers in the case of 500 pensioners whose names have been double the rate of receipts at any previous period except in 1866, and the widows of the attentions and year since 1871. The widow of Charles Dickens died at her residence in Gloucester, Crescent Regents Report of the Commissioner of Internal Park, England, on the 23d.

Near Lintdale, Mo., on the 20th, A. M. A dispatch from Calcutta says the north-Crockett and P. H. Nicholas, two well-to-do armers residing in the neighborhood, engaged in a quarrel about a hog belonging to Nicholas, which trespassed on Crockett's larious fever, which has increased to an enor-

> Annual Report of the Commissioner of Indian Affairs.

tribes is a pressing want. For murderers and the worst class of refractory Indians one settlement should be in Florida, which is far enough from Indian reservations to make any attempt at escape hopeless, Another settlement should be at some point in the Northwest where considerable land can be found upon which imprisoned Indians may be taught to work for their own support. The settlements should be guarded by a sufficient force to exercise perfect discipline, and trades as well as agriculture should be taught, and when the time arrived for them to be returned home the captives would have reached an advanced stage of civilization.

Outside of the Indian reservations men are everywhere found driving thrifty business in selling the latest and best patterns of arms and fixed ammunition to non-civilized Indians. The sales thus made are limited in amount only by the shility of the Indians to purchase. Previous to the late Ute outbreak the Indians were amply supplied with Winchester and Spencer rifles and fixed ammunition obtained from traders outside their reservation. There is no statute against this crime, and the Commissioner recommends that legislation be especially directed against such sales. A law by Compress prohibiting under severe penalty the sale of both firearms and fixed ammunition, and further legislation requiring non-civilized Indians to be disarmed, are the only common-sense and practicable methods of putting an end to this dangerous traffic.

The Poncas are reported as doing well on their new reservation, and rapidly advancing in the ways of civilization. The progress of the youths trained in Indian schools is of a most hopeful for civilized tribes of Indian Territory there are now over 7.100 Indian children taught at Agency schools. The five civilized tribes of Indian schools is of a law to prevent to one for the enactment of a law to prevent polygamy and provide for legal marriages among Indians. For this purpose it is proposed to make civil magistrates of Indian agents. Report of the Commissioner of Pensions

The increase in the numbers of legal distillerties be says will materially augment the expense

performances of their official duties, and I have the honor of renewing the recommendation made in my last report of the passage of such law by Congress."

The increase in the numbers of legal distilleries he says will materially augment the expense for storekeepers and gaugers, and will make it necessary that a deficiency appropriation be made for the present fiscal year of \$20,00?

There were during the year f,448 distilleries registered and 5,347 operated.

During the four months of the present fiscal year the decrease in receipts from tobacco and snuff, as compared with the corresponding period last year, was \$2,325,592. These figures indicate a reduction for the year in receipts from this source of over \$7,000,000. The increasing prosperity of the country which has given so favorable an impulse to all business has largely benefited the tobacco trade, and receipts have in consequence not suffered so heavily as was anticipated. Experience has shown that no material advantage has inured to the consumers in a reduction of price by reason of a reduction of tax.

During the fiscal year ending June 3), 1579, there were imported and withdrawn for consumption, 40,666,518 eigars, a decrease during the year 1579, of 1,634,482. The total amount of domestic leaf tobacco accounted for during the part 1579, of 1,634,482. The total amount of domestic leaf tobacco accounted for during the fiscal year of 1579 is 522,513,471 pounds, as follows: Manufactured in the United States, 6,221,562 pounds, Exported, 522,273,57 pounds; imported leaf manufactured in the United States, 6,221,562 pounds, the amount of manufactured and cigarettes removed for exportation was 22, 197 pounds, being an increase of exportation was 24, 197 pounds, being an increase of exportation was 24, 197 pounds, being an increase of exportation was 24, 197 pounds, being an increase of exportation was 24, 197 pounds, being an increase of exportation was 24, 197 pounds, being an increase of exportation was 24, 197 pounds, being an increase of exportation was 2

lyn by ferry are apt to look up at the great East River bridge and wonder great East River bridge and wonder what assurance they have that when the heavy floor is built and loaded with travel it will safely be held up by the suspending cables. These cables have just been tested by a machine which is the most elaborate and perfect of the kind in the world. It is the one planted on the Government grounds at the Watertown, Mass., Arsenal, designed by Mr. A. H. Emery, and is, indeed, a marvel of skilled construction, for it shows how many ounces are needed to break a piece of thread, and how many tons to fracture a steel beam. The tons to fracture a steel beam. The ons to fracture a steel beam. The apparatus is microscopic in accuracy, insomuch as it registers, in a breaking weight of a million pounds, within one pound of the mass needed. This was the machine selected to test the suspending cables, and Messrs. William H. Payne and Isaac Newton, engineers connected with the Brooklyn bridge, recently spent four days in the tests at the Arsenal, which is under charge of Col. T. S. Laidley, of the Ordanace of Corps. Instead of using small sections of the suspending cables, they took lengths that would make the results decisive. Not to go into technicalities, the tests were entirely satisfactory, and showed that the precautions taken in putting together the parts were ample for their purpose. The suspending the tests were entirely satisfactory and showed that the precautions taken in muting together the parts were ample for their purpose. The suspending cables were found by the engineers to possess a strength much greater than it is matter of regret that a machine so useful should be well the parts were any one of the suspending cables are an indicated by the section of the suspending cables are entirely satisfactory, and showed that the precautions taken in will be put upon them in actual use. The process of forcing the fruit is a matter of regret that a machine so useful should be well the put typon them in a catual use. At the Brook of the suspending cables, they took is the strain that will be put upon them in actual use. The process of forcing the fruit is received for what he didn't in proportion to the such as the strain that will be put upon them in actual use. The process of forcing the fruit is a matter of regret that a machine so useful should be well to have it used freely by the people.

It is a fact not generally known that the Bank of England supports a rifle of the process of the such as a process. The such as a process of the such as a process of forcing the ric apparatus is microscopic in accuracy, insomuch as it registers, in a breaking

in the hearts of the thousands who will read the name and their wander forth inquiring, "Adam who?" These are but the beginning of the perplexing questions that will arise when the Et-mira descendants of Adam sit down with paper and peneil to write out their

Why not, therefore, shun these diffi-culties by cutting deep into the shaft the first words, according to tradition, ever spoken on earth—those words in which Adam introduced himself to Eve: -The tunneling of the St. Gothard untain will be completed by the end -The Picayune says that crying be-hind a handkerchief cannot be looked 'Madam, I'm Adam?" His last words, unfortunately, have not been preserved; then let his first words be the inscription on his monument. The children of Adam from the lands where they read from right to left will come and spell out this reversible inscription and feel that their tastes have been consulted; and thus the pations of the -A young lady is not like a tree. You cannot estimate her age by counting her rings.—N. Y. Star. -The New York News tell of a man who was "killed by a fall of four feet." Did a mule jump on him.—Boston Post. sulted; and thus the nations of the earth will be drawn closer together at the foot of the monument reared to -If it wasn't for the weather there never would be any variety in some

After the people of Elmira have built and unveiled their monument to Adam, they will merit and wear the palm for far-reaching filial impulses—unless, in-deed, their example shall lead the scien-tific persons of the Materialist school to rear a still taller and costlier shaft to the beloved memory of Protoplasm. N. Y. Sun.

A True Story for Children.

When Mr. John Wise was lost in his balloon, called "The Pathfinder," several weeks ago, the newspapers printed many accounts of trips made into the air, some by brave men and some by foolish ones. A lady who lives in the found embedded in a cable, and a sinking ship has caused damage to a cable.

Sometimes the cables rest on the corrosive stones, copper ores, and ironstone, when corresion sets in and causes the cable to speedily fail. Volcanic action sometimes damages cables as also rock slips. In the Bay of Biscay, which is crossed by the Direct Spanish Company's cable, there is no doubt that such a cause has interfered with the cable on two occasions, curi-districtions. There is a peculiar shelving of the rock, and slips exactly equivalent to our landslips take place at intervals.

Leebergs, too, from the North Atlantic, wars and killing him. They made way for the title it must be a work in gum for the title it must be a work in developing. After eightyears' trial he managed to carry out his plans. I need not the state of the title it must be a work in dum for the title it must be a work in dum for the title it must be a work in dum for the title it must be a work in dum for the title it must be a work in dum for the title it must be a work in dum for the title it must be a work in dum for the title it must be a work in dum for the title it must be a work in dum for the title it must be a work in dum for the title it must tic, frequently carry large pieces of rock, which fall to the bottom when the iceberg thaws and in their descent are liable to fall across a cable and damage it.

There are also faults due to impersent the fairness of the balloon and it was proposed to name it America after a man, as Europe and Asia had been named after women. In this curious compliance of the balloon is the balloon and it was proposed to name it America after a man, as Europe and Asia had been named after women. In this curious compliance of the balloon is the balloon another's hat, but now things at a social gathering, for one man to get another's hat, but now things have any danger. The balloon was tied to be a common thing at a social gathering, for one man to get them, not thinking for a mother's hat, but now things have any danger. The balloon was tied to be a common thing at a social gathering, for one man to get them, not thinking for a mother's hat, but now things have any danger. The balloon was tied to any danger. The balloon was tied to any danger. The balloon was tied to any danger. fect joints, due to accidents that pass inspection during the process of manufacture, but which slowly develop then selves after submersion or lapse of time.

Lightning, earth currents, and things of that kind affect cables, but nevertheless, the eye of the telegraph engineer is constantly watching these circumstances as they happen, and he to imperation of mistakes the names were given to this continent and its inhabitants which will cling to them forever.—Prof. John Fiske's Lecture.

A Powerful Electric Eel.

A Powerful Electric Eel.

M. Marcy, who for some years has energaged in the study of these very singular aquatic animals, has announced to the Academy of Sciences that he has a little woman. In this curious complication of mistakes the names were given to this continent and its inhabitants which will cling to them forever.—Prof. John Fiske's Lecture.

A Powerful Electric Eel.

Marcy, who for some years has energaged in the study of these very singular aquatic animals, has announced to the Academy of Sciences that he has a missingular aquatic animals, has announced to the Academy of Sciences that he has a missingular aquatic animals, has announced to the Academy of Sciences that he has a march of the wind and some asked why he did not get married. "Why, you see, sah," said he, "I got an old mudder, an' if I don't buy her shoes an' stock-ins, an' bread an' butter, site wouldn't get none. Now, ef I was to get married, "Why, you see, sah," said he, "I got an old mudder, an' if I don't buy her shoes an' stock-ins, an' bread an' butter, site wouldn't get none. Now, ef I was to get married. "Why, you see, sah," said he, "I got an old mudder, an' if I don't buy her shoes an' stock-ins, an' bread an' butter site woman was once asked why he did not get married. "Why, you see, sah," said he, "I got an old mudder, an' if I don't buy her shoes an' stock-ins, an' if I don't buy her shoes an' stock-ins, an' if I don't buy her shoes an' stock-ins, an' if I don't buy her shoes an' stock-ins, an' if I don't buy her sho ter right out o' my mudder's mouf."

—Several young men were sitting together, and a young lady happened to approach the vicinity. One "real sweet" young fellow seeing, as he supposed, the young lady looking at him. houses like toy houses. She and Willie were going up, up all the time. "I expect we are going to heaven, Willie," said Nettie. Willie thought it was very cold in heaven then, for the higher they went the colder it grew. Nettie wrapped Willie in her apron and held his head in her lap until he cried himself fast asleep. Then Nettie folded her hands and waited. She said: "I think we must be near the gate now." She meant the gate of heaven that she heard about in Sunday school. But Nettie fell asleep, too. When she awoke she found that some strange man was lifting her from the basket. Northern Illinois, who had seen a bal-loon drifting low down across his field.

Gathering Figs.

The rope was dragging and so he caught it and landed the children safely. The balloon had floated all night. Nettie

and Willie's father soon learned that they had been found and took them

now a woman—the very same one who told the Republican to look back in its

ome two days afterward. Nettie is

Although indiginous to Asia and Bar bary, the fig has been so long and so extensively cultivated in Italy that it may be considered native, on the ground of the Irishman's remark that he had -Lord Odo Russell, while calling been a native of a certain county for upon Prince Bismarck, a short time cendemia or vintage; but it begins in August, owing to a curious system of culture. Early in that month as you sit gasping under the noonday sun you hear a wild eerie strain in minor-key which goes up and down the slopes with intense mournfulness. It is the song of the fig gatherers, tossed back and forth from hillside to hillside and away upon some pretext or other."
He had scarcely finished speaking when the Princess put her head in at the door and said: "Otto, you must come and take your medicine." from treetop to treetop as they squirm through the twisted branches and "oil the fruit." The tribe is nomadic, and appears and disappears like the wan-dering harvesters of France, no one dering harvesters of France, no one knowing whence they come or whither they go. Late in July the masserie are rented to them, they paying a given sum to the proprietor, and taking possession of all the fruit, beginning with the figs and ending with the last waxen. cluster of grapes. Rude huts, thatched with straw, are built by the proprietor in all his orchards, and there these two reshed madly into wearing these things.—Boston Post.

A Monument to Adam.
